

2018 NY Scholar Testimonial

Julio Ramos - Icahn School of Medicine at Mount Sinai

This scholarship provides more than just financial support in my medical education journey - it provides me encouragement to continue my participation in issues that are important for the health of my community, despite the unique demands of medical school. Your generous investment reassures me that there is a network of Latinx leaders in medicine with similar goals. I am grateful for this honor, and I am inspired to find ways to continue my advocacy for community health throughout my medical training as a student, resident, and attending.
