2018 CA Scholar Testimonial

Yesenia Andrade - Western University Health Sciences Nursing School

It is organizations like the National Hispanic Health Foundation that allow aspiring health care professionals like myself to create and be the change for our underserved Hispanic communities. As a nursing leader, I promise to uphold the values I cherish true to my heart and continue being an advocate for our people. Together we can continue breaking the numerous health care barriers our fellow Hispanic communities encounter. Muchas gracias NHHF.
